

Anmol Kumar Jha

Aspiring AI/ML Engineer with a strong foundation in full-stack development and real-time web applications. Focused on building intelligent, scalable systems by combining modern web technologies with artificial intelligence and machine learning.

EDUCATION

Indian Institute of Information Technology, Vadodara

2024 – 2028

B.Tech in Computer Science and Engineering

CGPA: 8.18 / 10.0

D.Y. Patil International School, Bihar

2021 – 2023

Senior Secondary Education

Score: 88%

TECHNICAL SKILLS

Programming: C, C++, Python, JavaScript (ES6+)

Full Stack: React.js, Tailwind CSS, Node.js, Express.js, REST APIs, Web Sockets, MongoDB, MySQL

AI / ML: NumPy, Pandas, Seaborn(basics), Matplotlib, TensorFlow, OpenCV, Prompt Engineering, RAG, LangChain

Tools & Deployment: GitHub, Postman, Netlify, Vercel, Render

Relevant CourseWork: DBMS, OOPs, Operating System, Data Structures and Algorithms, Digital Logic Designs

EXPERIENCE

Nav Astitva - Skill Development Center

Dec 2025 – May 2026

Full Stack Web Developer

Bihar, India (Remote Intern)

- Designed and developed certain sections of the official website of the NGO and developed an E-certificate distribution system of the NGO-collaborated skill development center using modern full-stack web technologies.
- Implemented responsive UI and backend logic for dynamic content and smooth user interactions.
- Managing and coordinating social media handles to enhance digital presence.

PROJECTS

TRAFF-IQ | *Intelligent Traffic Management System* Finalist @ Hackatron, IIIT Gwalior

- Developed an AI-driven adaptive traffic control system using Python, YOLOv8, and OpenCV for real-time traffic detection and signal optimization.
- Implemented emergency vehicle detection with 90% accuracy, enabling priority-based signal clearance.
- Built traffic density estimation and dynamic signal timing with 85% accuracy based on lane-wise vehicle count.
- Designed traffic rule and red-light violation detection achieving 85% accuracy using computer vision techniques.
- Integrated a full-stack data pipeline with Flask, Node.js, and Socket.io to log intersection analytics and broadcast real-time updates to a live dashboard, integrated with Arduino hardware control for on-ground signal actuation.

SKETCHAA | *Real-Time Multiplayer Drawing Game*

- Developed a real-time collaborative drawing platform using React, Socket.IO, and the HTML5 Canvas API.
- Implemented low-latency multiplayer gameplay with synchronized canvas updates, live chat, room management, timers, and dynamic leaderboards using WebSockets.
- Integrated **Ollama** with the **Qwen2.5-VL** vision-language model for AI-powered drawing recognition and automated sketch evaluation.
- AI-assisted judging, and real-time score calculation to enhance gameplay and player engagement.

ACADMATE | *Academic Management App* Flutter, Dart, Firebase Auth, Cloud Firestore, Firebase Storage, Git

- Built a cross-platform academic management app supporting 4 user roles (Student, Teacher, CR, Admin) with role-based access control.
- Digitized attendance, results, and notifications, reducing manual administrative effort by 50%.
- Designed Firebase-backed real-time data syncing, enabling instant updates across all users with <1s latency.
- Modularized screens and services, improving feature scalability and reducing future development effort by 35%.

ACHIEVEMENTS

- 3 Star @CodeChef.
- Pupil @Codeforces.
- 500+ Questions on all platforms.
- Contributor @ GsSoc 2026.
- Finalist at Hackatron, IIIT Gwalior.
- JEE Advanced Rank: 13k.
- JEE Main Percentile: 98.4.
